Instagram-Ready Art

The idea began with a premise: bring people into an exotic world celebrating Florida's picturesque natural attributes. To pull this off, **Key West's Audubon House & Tropical Gardens** converted a room into a tropical paradise, complete with neon-pink AstroTurf, a key-lime couch, colorful walls of artwork, a garden sprouting from the ceiling and holograms spinning wildly above. Celebrating the birds beloved by naturalist John James Audubon, the house describes the room as Instagram ready, with a tropical vibe perfect for your next profile pic. audubonhouse.com.
